SELF-ASSESSMENT · 911 TECHNICAL STANDARD V2.0

KabatOne

Does your CAD meet Mexico's 911 Technical Standard?

Center: _____

Date: _____

System assessed: _____

22 requirements that SESNSP's 911 Technical Standard v2.0 sets for the CAD and GIS of a 911 center (CALLE), with the clause number and the question to verify it with your vendor. Mark each one and note the evidence.

Platform and availability

CLAUSE	REQUIREMENT	ASK THE VENDOR	STATUS	EVIDENCE / NOTES
4.2	A mission-critical system on high-availability hardware and software, with redundant servers, databases and networks.	What is the redundant architecture, on-premise and in the cloud?	☐ Met ☐ Partial ☐ Not met	
4.2.1	A disk failure must be transparent to operation.	What happens to operations if a disk fails?	☐ Met ☐ Partial ☐ Not met	
4.2.2	Run on a commercial operating system, or one derived from in-house development.	Which operating systems do the server and workstations run on?	☐ Met ☐ Partial ☐ Not met	
4.2.3	A commercial, non-proprietary database whose table structure can change without interrupting the system.	Which database engine, and can its schema change while live?	☐ Met ☐ Partial ☐ Not met	
4.2.4	Can be backed up while in operation.	How and how often is it backed up without stopping service?	☐ Met ☐ Partial ☐ Not met	

Integrations the CAD must have

CLAUSE	REQUIREMENT	ASK THE VENDOR	STATUS	EVIDENCE / NOTES
4.2.5.1	A live integrated map showing incidents, video surveillance points and GPS units.	Does one map show incidents, cameras and units in real time?	☐ Met ☐ Partial ☐ Not met	
4.2.5.2	CTI integration with the phone switch, ready to accept ANI and ALI.	Which phone switches does it integrate with, and how does it receive number and location?	☐ Met ☐ Partial ☐ Not met	
4.2.5.3	Integration with the voice recording system.	Is the recording linked to the incident?	☐ Met ☐ Partial ☐ Not met	
4.2.5.4	Integration with automatic vehicle location (AVL).	Which AVL systems, and how often do positions update?	☐ Met ☐ Partial ☐ Not met	

CLAUSE	REQUIREMENT	ASK THE VENDOR	STATUS	EVIDENCE / NOTES
4.2.5.5	Integration with the video surveillance system.	Which VMS platforms, and can operators open a camera from the incident?	☐ Met ☐ Partial ☐ Not met	
4.2.5.6	Interfaces to exchange information with other CAD systems and with the IPH (police report) databases.	How does it exchange data with another CAD and with the IPH?	☐ Met ☐ Partial ☐ Not met	
4.2.5.7	Emergencies visible on smartphones or tablets, with their location on a map.	What does the field unit see on its device?	☐ Met ☐ Partial ☐ Not met	
4.2.5.8	Store information using the current National Catalogue of Emergency Incidents (CNIE) nomenclature.	Does it classify natively with the current national catalogue?	☐ Met ☐ Partial ☐ Not met	
4.2.5.9	Support for operators giving telephone first aid, using the SESNSP-issued protocols.	Does it include the SESNSP first-aid protocols?	☐ Met ☐ Partial ☐ Not met	
4.2.5.10	Connection to highway arches (licence-plate reading).	Does it receive highway-arch alerts into the incident?	☐ Met ☐ Partial ☐ Not met	

Decision support

CLAUSE	REQUIREMENT	ASK THE VENDOR	STATUS	EVIDENCE / NOTES
4.2.6	Features that improve response times by integrating support platforms and information for real-time decisions.	What does the system recommend to the operator, and who decides?	☐ Met ☐ Partial ☐ Not met	

Geographic information system (GIS)

CLAUSE	REQUIREMENT	ASK THE VENDOR	STATUS	EVIDENCE / NOTES
4.8.1	A GIS linked to or integrated with the CAD.	Is the GIS part of the CAD or a separate system?	☐ Met ☐ Partial ☐ Not met	
4.8.2	A vector platform or real-time web mapping.	Which mapping does it use, and who updates it?	☐ Met ☐ Partial ☐ Not met	
4.8.5	Minimum layers: state, municipality, neighbourhoods (colonias), streets and points of interest.	Does it include layers down to colonia level?	☐ Met ☐ Partial ☐ Not met	
4.8.6	Data compatible with standard formats such as SHP, KML, TAB, DXF or GML.	Which formats does it import and export?	☐ Met ☐ Partial ☐ Not met	
4.8.7	Search by address with specific fields.	How does it search an incomplete Mexican address?	☐ Met ☐ Partial ☐ Not met	

CLAUSE	REQUIREMENT	ASK THE VENDOR	STATUS	EVIDENCE / NOTES
4.8.8	Generate custom thematic maps.	Can it produce heat maps by incident type?	☐ Met ☐ Partial ☐ Not met	

Summary

Met: ____ / 22 · Partial: ____ · Not met: ____

Priority gaps: _____

A working aid for reviewing a system or preparing a tender's technical annex; it does not replace the official text of the standard. Source: Norma Técnica 9-1-1 v2.0, SESNSP: https://www.gob.mx/cms/uploads/attachment/file/895276/NT_CALLE_2023_II-2024_final.pdf
